

3.Email the applicants the feedback.

The emails should be sent:

- automatically [Point #1] and in bulk [#1]
- once all interviews for a position are completed. [#2]

This is more a back-end function [#1].
The UI for this should be:

- A list of 'valid' roles (for which the interviews are complete [#2])
- A way of choosing - very simple - perhaps a drop down list showing one type [valid] roles.
